## EDUCATION

### APTECH

Lagos, Nigeria

Web Application With Python

Graduation Date: Oct 2024

## WORK EXPERIENCE

@sir

Remote

Fullstack Developer

Oct 2024 - Present

- Designed and implemented key features for a travel budget website, including trip creation, editing, and authentication, utilizing expertise in front-end and back-end development.
- Collaborated with the team to develop a robust and scalable database schema, ensuring seamless data storage and retrieval for trip itineraries and user information.
- Built and integrated APIs for secure payment processing, mapping services, and other third-party integrations, enhancing the overall user experience and functionality of the travel budget website.

@sir

Remote

Fullstack Developer

Aug 2024 - Aug 2024

- Developed a comprehensive event management platform for [Company Name], enabling users to create, update, and delete events, as well as track event details and RSVPs.
- Designed and implemented a robust authentication system, ensuring secure login and registration for users, and role-based access control for administrators to approve and manage events.
- Built an intuitive admin dashboard, providing administrators with tools to review, approve, and manage events, as well as analyze event performance and user engagement metrics.

@sir

Freelancing

Fullstack Developer

Aug 2024 - Oct 2024

- Designed and developed a responsive e-commerce platform using React, providing users with a seamless shopping experience across various devices.
- Built a RESTful API backend, integrating with React frontend to enable features such as product browsing, shopping cart management, secure payment processing, and order tracking.
- Implemented features for product management, inventory tracking, and user authentication, utilizing API endpoints to interact with the database and ensure data consistency across the application.

## PROJECT EXPERIENCE

### ALLSEEK

Fullstack

Start Date - Finish Date

- Designed and developed a comprehensive job application website using Django, featuring a dual-authentication system for recruiters and applicants, enabling secure and efficient management of job postings, applications, and notifications.
- Implemented a robust backend infrastructure using Django Rest Framework, database modeling, and authentication/authorization systems, ensuring seamless interactions between recruiters and applicants, and providing real-time notifications and application status updates.
- Utilized Django Template Engine, HTML5, CSS3, and JavaScript to craft an intuitive and user-friendly interface, facilitating easy job posting, application submission, and notification management, while ensuring a responsive and engaging user experience across various devices and platforms.

### TREND CONVERTER

- Designed and developed a responsive and user-friendly currency converter website using React, enabling users to effortlessly convert currencies and stay up-to-date with real-time exchange rates.
- Implemented a robust and scalable architecture, utilizing React components, hooks, and APIs to fetch and display accurate currency exchange data, ensuring seamless user interactions.
- Utilized React's state management and event handling capabilities to create a dynamic and interactive interface, featuring real-time currency conversion, error handling, and intuitive user input validation.

## SPENZ BLOG

*Start Date - Finish Date*

- Designed and developed a fully functional blog using Django, featuring a customizable and responsive template, enabling users to create, edit, and publish articles, and engage with others through comments.
- Implemented a robust backend infrastructure using Django's ORM, models, and views, ensuring seamless article creation, editing, and deletion, as well as secure user authentication and authorization.
- Utilized Django templates to craft a visually appealing and user-friendly interface, incorporating features such as article categorization, tagging, and searching, to enhance user experience and engagement.

## LEADERSHIP EXPERIENCE

---

### TECHWIZ

*Fullstack**Start Date - Finish Date*

- Spearheaded a high-performing team to participate in the prestigious Techwiz competition, guiding them to design and develop a full-stack traveling budget website that showcased exceptional technical expertise and innovation.
- Fostered a collaborative and inclusive team environment, empowering members to take ownership of specific components of the project, and providing guidance and support to ensure seamless integration and successful project delivery.
- Led the team to achieve a remarkable 3rd place finish in the global Techwiz competition, demonstrating exceptional leadership, strategic thinking, and technical expertise, and showcasing the team's capabilities in building complex and innovative technology solutions.

## SKILLS & INTERESTS

---

**Skills:** Frontend - HTML5, CSS3, JavaScript (ES6+), React, Tailwind Css Backend - Django, Python, RestfulApi, MySQL, PostgreSQL, SQLite Git

**Soft Skills:** Problem Solving, Communication, TeamWork, Time Management, Attention To Detail

Linux (Ubuntu, CentOS)

- Heroku

**Hosting:** - Vercel

- Render
